

PRELIMINARY RESULTS OF 2013 TRA TRACK DATA SURVEY

November 2013

Track	Track moisture content level in the fall?	Track cushion depth during racing?
Calder	35%	4 1/2 inches
Canterbury Park	Around 9%	Around 4 inches
Churchill Downs	It constantly changes due to weather, shaded areas, etc.	3 inches
Delaware Park	approximately 38%	4 inch cushion, with a 3 inch sub-base between cushion and base
Hastings	Our weather is so un-predictable in the fall that it is very hard to keep any consistency in the surface moisture level.	Our track surface is 8 inches from the limestone base to the top of the surface.
Portland Meadows	16%	4 inches
Remington Park	12%	3 inches
Woodbine	Polytrack 18.6 %	Total depth is 7 inches. Cushion is 3 1/2 inches when racing

Totals: 8
